

securityProbe 5ESV-X60

securityProbe 5ESV-X60

Monitor the physical environment and receive alerts of any disturbances, such as unauthorized intruders, security breaches, high temperatures, smoke, water leakages, power outages and more.

Compatible with all of the AKCP range of Intelligent Sensors it provides a complete environmental, access control and security monitoring solution.

Introducing the securityProbe 5ESV-X60

The securityProbe 5ESV-X60 has a Linux Operating System running an iMX25 CPU. An additional 2 Gigabytes SD card can be installed to provide greater storage capacity. It is TCP / IP compliant and runs lighttpd web server including https (SSL), Bash, Perl, Telnet, PHP, Email and Nagios. The securityProbe 5ESV has an easy-to-use web-based user interface for sensor configuration, data collection and extensive graphing. Complete SNMP functions such including SNMP v3 encryption are supported.

securityProbe 5ESV-X60 Monitoring System

The securityProbe 5ESV-X60 also supports Modbus Master/Slave, Modbus RTU and Modbus over TCP / IP creating a unique, easy to configure Modbus to SNMP gateway. The web-based interface is written in PHP allowing end-user changes such as language translation. The securityProbe 5ESV has a battery backed time of day clock for accurate record keeping.

securityProbe 5ESV-X60's OnBoard Architecture

Up to 8 of AKCP's intelligent sensors can be plugged into the RJ-45 ports of the securityProbe 5ESV-X60. Once inserted, the sensor automatically configures itself and goes online. Our easy-to-use web based interface allows you to setup the securityProbe 5ESV-X60 within minutes.

- AKCP i.MX25 Processor
- 128 Megabytes of Onboard NAND Flash
- Onboard SD card slot
- 10/100 Mbps Ethernet Port
- 5x USB 2.0 Port
- 60 Dry Contact Ports
- RS485 Ports
- Internal Audio Speaker
- Internal Microphone
- 8 Full AutoSense RJ-45 Ports
- 2x RJ-45 Expansion Ports
- Video Enabled

Applications

Connect up to 4 External USB Cameras

The securityProbe 5ESV-X60 can display pictures from a maximum of four digital USB cameras simultaneously in several sizes, up to 640x480 pixels resolution.

AKCP cameras are used in professional surveillance and CCTV monitoring systems. A built-in pan-tilt controller interface allows complete control of pan and tilt cameras using the industry standard Pelco D bus.

External Camera PTDC Control

Sensor Graphing

The securityProbe 5ESV-X60 integrates and displays graphs of all sensor data in its web-based user interface. The individual graph (day, week, month and year) for each sensor type can be customized, simply by modifying the script template used to generate a particular graph. RRD tool is used to build an embedded database of sensor data.

This data can be accessed from the web interface, or downloaded to a remote PC. MRTG can be used to generate real-time graphs of sensor data on a remote website.

False Message Filter

In order to prevent false alarms, the SEC 5ESV-X60 allows extensive filtering of events. You can limit events based on the time of day or the day of the week. You can also limit the number of alerts per hour, so that you are not swamped with many messages. This is especially important with the sensor like the motion detector where you may want to process an event only when the business premises are closed.

False Message Filters via Calendar Setups

Sensor Integration & Notification System

securityProbe 5ESV Example Notification

Up to 8 of AKCP's Intelligent Sensors can be connected to the securityProbe 5ESV-X60. When plugged in, the sensor automatically configures itself and goes online. Using either the E-sensor 8, or the E-opto 16 expansion modules, up to 500 sensors can be connected to a single unit. Our easy-to-use web based interface allows you to setup the securityProbe 5ESV-X60 within minutes. When online, the sensors use their 4 levels of threshold checking and report any status change.

Notifications and alarms can be dependent on the states of multiple sensors, and can be configured to escalate in severity over time. The notification system can alert

you of a problem via email, SMS messages and telephone calls, (additional hardware required), or send a message to any commercial network monitoring system using SNMP traps. The securityProbe 5ESV-X60 can automatically switch a relay on or off, wake-up or shutdown a remote server, send pictures and data

via FTP, send a FAX, run your custom script and many more versatile functions.

The securityProbe 5ESV-X60 can automatically push out the complete status of the unit and sensors via the Heartbeat Message feature. This can be setup to be sent through e-mail, SMS or SNMP traps. A HTTP get script can also be chosen, allowing the data to be pushed to web servers.

Industry Certifications & Network Management Systems

AKCP offers NMS Integration for leading network management systems such as:

- AdRem NetCrunch
- IBM Tivoli
- SiteScope
- Quest Software – Big Brother
- Lorient Pro
- Somis WebNM and Denika
- Castle Rock
- Logalot
- WhatsUp Gold
- HP OpenView
- MRTG
- Computer Associates Unicenter TNG

Support and Warranty

- **Full One Year Global Warranty**
- **Unlimited Lifetime Support.**
- **Free Firmware Updates.**
- **Full, Easy to Follow Documentation.**

securityProbe 5ESV-X60 Features List

- Embedded web server displays sensor information and live video from connected cameras.
- Control 4 PTZ cameras directly from the web interface.
- Record digital video to remote servers or internal memory, or send live images to your own website.
- Connect up to 4 digital USB cameras, and simultaneously display images up to 640x480 px resolution.
- Receive notifications of anomalous events via email, SMS / MMS, SNMP traps, and many more.
- Integrates with network management systems via SNMPv1 and Encrypted SNMPv3.
- Stream video and sensor information directly to your cellphone or PDA.
- Ability to connect external GPRS / GSM modem, Bluetooth and WiFi USB adapters.
- Uses Linux operating system for maximum stability and flexibility.
- Virtual Sensors monitor power, Modbus, network devices, and other SNMP based equipment.
- Built-in graphing and data logging, internally or to a remote PC.
- Platform independent; free firmware upgrades and utilities from AKCP.
- Monitor up to 500 intelligent sensors using expansion modules (E-Opto 16 and E-Sensor 8)
- Compatible with complete range of AKCP Intelligent Sensors
- Full Modbus support : Modbus Master / Slave, Modbus RTU, Modbus over TCP / IP

Technical Specifications

<p>Dimension</p> <p>Size : 18.5" x 5" x 3.45" Weight : 4.4 Pounds</p>	<p>Expansion Ports</p> <p>2x RJ-45 Expansion Ports 115.2K BPS Data Transfer Rate Simultaneous Functionality between Expansion Ports & RS485 Port Threshold Status</p>	<p>Mounting</p> <p>Rack Mount Brackets included Compatible with AKCP's DIN and Rack Mount Trays</p>
